Clinical Application of Endoscopic Submucosal Dissection in Malignant Gastrointestinal Tumors and Precursors

Message from the Guest Editors

Advanced healthcare systems support systematic screening programs for the diagnosis of premalignant and early malignant lesions. To ensure maximum benefit for patients, these findings should be treated using minimally invasive techniques. This not only improves prognosis but also contributes to anatomical and functional organ preservation. Within the gastrointestinal tract, the most advanced endoscopic technique for achieving these goals is endoscopic submucosal dissection (ESD). Depending on the results of pretherapeutic staging, more invasive options, such as surgical resection, radiation, or systemic medical therapies, might represent the preferred choice. This underscores the critical importance of the staging process. In this Special Issue, we are gathering original data on advanced endoscopic imaging and staging, along with the application of ESD in the esophagus, stomach, duodenum, and colorectum. Reviews on ESD, highlighting its advantages and drawbacks within the therapeutic network, will complement this virtual collection of articles. We warmly invite researchers to contribute to our project.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
