## Special Issue

## Clinical Application of Transcranial Magnetic Stimulation (TMS)

### Message from the Guest Editor

Transcranial magnetic stimulation (TMS) has evolved from a research tool to a highly standardized technique that can be used in daily clinical routines. Through its non-invasiveness and when combined with neuronavigation (nTMS), the technique per se offers multiple options regarding the diagnostics, therapy, or rehabilitation of patients suffering from various pathologies. Apart from my own focus on the pre-, intra-, and postoperative clinical application of nTMS in neurosurgery, several types of medical professionals. The purpose of this Special Issue is to give a comprehensive overview summarizing the latest research on the clinical application of TMS for 1) cortical brain mapping and monitoring of functionality, 2) its use as a basis for anatomical tractography or connectome analysis, 3) therapy of neurological and psychiatric diseases, pain and further pathologies, 4) support and therapy during neurorehabilitation, 5) the impact on the patients' clinical, functional, or oncological outcome, 6) as well as the visualization of functional reorganization or therapy effects.

### **About the Journal**

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### **Editors-in-Chief**

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
