Photodynamic Therapy in Dermatology and Oncology: Latest Advances and Prospects

Message from the Guest Editors

Photodynamic therapy (PDT) is a well-known treatment for cancer. It is very well established for treating non-melanoma skin cancer, although the clinical use in other type of cancers is limited. However, the research in this field is increasing year by year. Better ways to deliver the photosensitizer, combination with other molecules to enhance efficacy, better knowledge of biomarkers to predict the response, or the possibility of using PDT to perform diagnosis and therapy at the same time (theragnosis) are some of the many fields of PDT research. The aim of this Special Issue is to provide a comprehensive overview of the latest advances in PDT for cancer, with particular interest in those near to transfer to the clinic. Therefore, researchers in the field of PDT in oncology are encouraged to submit their findings as original articles, reviews or brief communications to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
