

## Special Issue

# Early-Stage and Operable Non-Small Cell Lung Cancer Treatment: Current Practice and Future Perspectives

### Message from the Guest Editors

Non-small cell lung cancer (NSCLC) remains the leading cause of cancer-related deaths in the U.S. and globally. Over the last decade, however, incidence-based mortality rates have declined at accelerated rates, not only due to efforts in screening for detection of early-stage disease, but also due to remarkable advances in the treatment of metastatic NSCLC. These include the approval of checkpoint inhibitors and a variety of targeted therapies which require comprehensive biomarker testing. Over the last 5 years, a multitude of clinical trials investigating the role of such therapies for the improvement of long-term survival of operable patients has come to fruition. With the approval of targeted therapy and checkpoint inhibitors, a fast-paced change in the standard of care has demanded an integrated and effective multidisciplinary care of patients with operable NSCLC. This Special Issue will include narrative reviews on the current treatment, as well as future perspectives for the management of early-stage and operable patients with NSCLC, encompassing biomarker testing, advances in systemic therapy and surgical treatment, and their early rehabilitation.

### Guest Editors

Dr. Francisco Aécio Almeida

Department of Pulmonary Medicine, Respiratory Institute, Cleveland Clinic, Cleveland, OH 44195, USA

Dr. Debora S. Bruno

Division of Hematology and Oncology, Case Western Reserve University Hospitals/Seidman Cancer Center, Cleveland, OH 44106, USA

### Deadline for manuscript submissions

closed (20 May 2025)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
