IgA Nephropathy: Recent Advances and Prospects

Message from the Guest Editor

In recent years, a progressive advance in the understanding of the pathogenesis of IgA nephropathy has emerged, but it is still not well defined. Although an increasing number of clinical trials of therapies for IgA nephropathy are being published, there is still no available treatment, and many of the current treatment strategies are common to other forms of chronic glomerular disease. The development of personalized treatment approaches offering the most appropriate therapy for each patient is an important area of research. The aim of this Special Issue is to provide a comprehensive overview of the advances in the pathogenesis and novel therapies for IgA nephropathy. A better understanding of the pathogenesis of IgA nephropathy will lead to earlier diagnosis as well as better disease-targeted therapy. Therefore, researchers in the field of glomerular diseases are encouraged to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
