

## Special Issue

# Hand Surgery: Clinical Advances and Practice Updates

### Message from the Guest Editor

Hand surgery utilizes and incorporates diverse techniques from orthopedics, plastic surgery, and microvascular surgery. Hand surgeons treat fractures of the hand and upper extremity, tendon repairs, tendon transfers, and reconstruction following traumatic injuries and burn injuries to the hand. Corrections of hand deformities and contractures and congenital defects are some of the most common procedures performed.

Hand surgery also utilizes the microsurgical reconstruction of amputated digits and limbs, the repair and reconstruction of soft tissue and bone, and nerve reconstruction. Hand surgeons also treat sport injuries with advanced techniques such as arthroscopy and ligament reconstructions. Advances in hand surgery over the last decade include the use of nerve allografts and nerve transfers, improvements in fracture fixation, and the use of minimally invasive techniques such as arthroscopy and wide-awake hand surgery. Joint replacements have replaced joint fusions and allow for the preservation of motion. The aim of this Special Issue is to address new advances in the growing field of hand surgery.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
