Emergency Ultrasound: State of the Art and Perspectives

Message from the Guest Editors

Point-of-care ultrasound in emergency medicine has undergone significant advancements in its implementation across various departments that handle patients with acute and exacerbated chronic conditions, both in in-hospital and out-of-hospital settings. The goal in this care setting is to use ultrasound at the point of care to aid in the diagnosis and management of any urgent, emergent, or critical condition prompting assistance, including severely injured and polytraumatized patients and cardiopulmonary resuscitation, as well as guiding procedures and monitoring certain pathologies, their initial evolution, and the treatment instituted. In this Special Issue, we invite authors to submit papers on the advances of point-of-care ultrasound in terms of the diagnosis, monitoring, and prognosis of acutely ill patients.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
