

Special Issue

The State of the Art in Fertility Preservation for Adults and Children

Message from the Guest Editor

The modern field of fertility preservation has come to the forefront because young people suffering from cancer and requiring treatments that are gonadotoxic have reported fertility loss as one of the most difficult aspects of their cancer treatment with which to cope.

Fertility preservation is also a rapidly evolving discipline, combining reproductive medical and technical developments and applying them to patients with diverse conditions beyond cancer, including genetic conditions associated with a premature onset of gonadal insufficiency. Cryopreservation of reproductive cells and tissues is a fundamental tool in the development of clinical programs for FP, and they have established their usefulness in clinical situations. Several proposed novel treatments are also being tested.

For this Special Issue, we hope to encourage submissions that discuss the current state of the art, addressing ongoing knowledge gaps and focusing on ongoing controversies related to fertility preservation and the management of young adults and children facing infertility due to treatments for malignant or benign diseases or with a genetic predisposition to premature gonadal insufficiency.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
