Fertility Preservation and Conservative Therapy in Malignant and Benign Gynecological Diseases

Message from the Guest Editors

As you undoubtedly know, some treatments for malignancy or other benign medical disorders can irrevocably impair reproductive function and lead to infertility. In addition, the great strides made in healthcare in recent decades have resulted in a growing proportion of young patients facing fertility problems. Before undergoing any such treatment, patients should be counseled to discuss their fertility preservation options. Indeed, biological parenthood is possible in most cases as long as the subject is referred to a specialized fertility unit in good time. Unfortunately, at present, too many medical professionals are still unaware of this and patients are referred too late. In this Special Issue, we hope to raise awareness among healthcare providers by encouraging publications that provide detailed overviews of established fertility preservation techniques in female patients, consider the safety of these procedures, and address current research advances in the field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
