The Utilization of Fluorescein in Central Nervous System Tumor Surgery

Message from the Guest Editor

It is well established that the extent of surgical resection has a positive impact upon the clinical course of many brain tumors, including gliomas. As a consequence, many tools have been introduced to pursue this aim. In particular, sodium fluorescein has emerged as a safe, cheap, and effective dye for highlighting the tumor tissue, especially at its margins where surgical resection is more challenging. The aim of this Special Issue is to gather, in one collection, reviews and original research articles to illustrate the current applications, advantages and disadvantages, and future potential of sodium fluorescein in the field of neuro-oncological brain surgery. Specifically, the combination of fluorescein-guided surgery and intraoperative imaging tools, such as neuronavigation, ultrasound (US), and MRI, is a stimulating and underdeveloped field of research. Moreover, comparison of sodium fluorescein and other fluorescent drugs would be an interesting topic for discussion. Finally, contributions on the use of fluorescein-aided confocal laser endomicroscopy will also be welcome.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
