Foot & Ankle Pathology: Emerging Approaches

Message from the Guest Editor

Foot and ankle problems have existed since the beginning of mankind, but never received special attention in the past. Only during the past century have medicine and surgery started to focus on this anatomical region. This was highlighted by the establishment of national and international foot and ankle societies and corresponding focused journals, and an increasing number of dedicated publications. Currently, knowledge in this field is still rapidly expanding based on basic, translational, and clinical research. This means that outcomes for pathology in this region are still improving both by optimizing existing treatments and by developing completely new ones. Interestingly, this progress is seen both in conservative and surgical approaches. This Special Issue will focus on all emerging insights and ideas that currently contribute to the abovementioned progress, to provide the reader with a broad update on what can be expected in the coming decades in this field. Therefore, we would like to invite authors to submit reviews or original research that fit this scope.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France
