

Special Issue

Emerging Trends and Debates in Breast Cancer: Impact of Research on Surgical Strategies

Message from the Guest Editors

Breast cancer remains a significant health challenge globally, and surgical treatment plays a crucial role in its management. This Special Issue aims to provide a comprehensive overview of the latest advancements, techniques, and controversies in the surgical management of breast tumors. Through a combination of original research articles, reviews, etc., this Special Issue aims to delve into the various aspects of breast cancer surgery, including breast-conserving surgery in selected patients, conservative mastectomy and prepectoral breast reconstruction, minimally invasive surgery, oncoplastic techniques, axillary lymph node de-escalation treatment, intraoperative imaging margin assessment, and the management of lesions of uncertain malignant potential in the breast (B3). Additionally, we aim to explore the emerging trends in surgical oncology, such as minimally invasive approaches, targeted therapies, and personalized treatment strategies with a focus on controversial situations. Therefore, researchers in the field of breast surgery, breast oncology, and surgical oncology are encouraged to submit and share their insights, experiences, and innovations in breast cancer surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
