Stomatognathic Diseases: State of the Art and Future Perspectives (Second Edition)

Message from the Guest Editor

Stomatognathic systems are heterogenous anatomic apparatuses that consist of radically different organs: teeth, bones that form the oral cavity, soft tissues (gingiva, mucosa, tongue, cheeks, lips), muscles that are involved in chewing and swallowing, salivary glands, and temporomandibular joints. Despite their differences, the pathologies of organs in the stomatognathic system share common characteristics, the most important of which is that they may be heavily linked to general health conditions. Due to reciprocal interactions between periodontitis and diabetes and multiorgan pathologies such as lichen planus and oral/salivary gland cancer, multidisciplinary approaches are often required. After the success of the Special Issue “Stomatognathic Diseases: State of the Art and Future Perspectives”, this second edition is in production. We continue to encourage authors to submit original articles (prospective studies and reviews will be preferred) that present robust scientific methods, thus representing a topical and immediately available guide for physicians that contains evidence-based approaches.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
