

Special Issue

Type 2 Diabetes – Pathophysiology, Prevention and Treatment

Message from the Guest Editor

Currently, type 2 diabetes is undergoing a paradigm shift in our understanding of various facets of the disease. All colleagues are invited to submit articles addressing new ideas or data about the pathophysiology of diabetes. Furthermore, research into innovations in diabetes management, including new diagnostic aspects, innovative treatment approaches, improvements in chronic care management and new assets in diabetes treatment concepts, is very welcome. Articles related to public health or epidemiological aspects related to diabetes care are invited, as well as those concerning new concepts using digitalisation in improving self-management or diabetes care. Our goal is to provide a Special Issue that provides a good understanding of the challenges and facets of diabetes care, as well as a good overview of innovations of diabetes management. I welcome the submission of various kinds of articles, original articles, reviews or communications. **Keywords:** prevention of diabetes; digital diabetes therapeutics; disease management; pathophysiology of type 2 diabetes

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
