Gynecologic Cancers: Integrating Established Standards and Innovative Approaches

Message from the Guest Editors

The clinical management of gynecological cancers continues to evolve at the interface between well established therapeutic standards and rapidly emerging technologies. Classical topics remain highly relevant—including radical hysterectomy and fertility-preserving surgery for early cervical cancer, cytoreductive approaches for advanced ovarian disease, and the standardized use of concomitant chemoradiation and brachytherapy in locally advanced cervical carcinoma. These conventional modalities have significantly improved survival outcomes, yet optimization of surgical extent, timing of adjuvant therapy, and management of long-term toxicities remain subjects of active clinical debate. By bringing together both classical and emerging clinical topics, this Special Issue aims to foster interdisciplinary dialogue between surgeons and radiation oncologists. This Special Issue welcomes the submission of original research articles, review articles (with systematic reviews being especially encouraged when applicable), and meta-analyses addressing any aspect of the clinical, surgical, or radiation management of gynecological cancers. About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
