Recent Advances in Gastrointestinal Endoscopy

Message from the Guest Editor

Recently, there have been remarkable advances in endoscopic diagnosis and treatment of gastrointestinal neoplasms in accordance with improvements in endoscopic technology. In particular, the application of artificial intelligence (AI) to endoscopic diagnosis and the development of image-enhanced endoscopy (IEE) have markedly progressed, and these have a stronger influence on the clinical diagnosis of gastrointestinal neoplasms. These endoscopic technologies provide opportunities for minimally invasive endoscopic treatment, including endoscopic submucosal dissection (ESD) and endoscopic mucosal resection (EMR). While the technical difficulty of endoscopic treatment was high, many kinds of efforts have improved the security of endoscopic treatment. Authors can submit original articles, reviews, or short communications. We encourage submissions of papers on topics surrounding the endoscopic diagnosis and treatment of gastrointestinal neoplasms.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
