Cardiac Arrest and Postcardiac Arrest Care: State of the Art and Future Directions

Message from the Guest Editors

The field of cardiopulmonary resuscitation (CPR) and postcardiac arrest care continues to advance. However, some aspects of cardiac arrest management still lack robust scientific evidence yet are applied in clinical practice, and many areas remain under active investigation. Moreover, since relatively few studies have focused exclusively on patients with cardiac arrest, much of their management in the ICU continues to rely on evidence derived from general critical care. The Special Issue “Cardiac Arrest and Postcardiac Arrest Care: State of the Art and Future Directions” will focus on the following topics:

- Postcardiac Arrest Syndrome;
- Postcardiac Arrest Care in the ICU;
- Targeted Temperature Management;
- Strategies to improve survival and neurological outcomes after the return of spontaneous circulation (ROSC).

We sincerely welcome contributions from leading experts in the field of resuscitation and look forward to receiving cutting-edge research exploring the topics outlined above.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
