Trends and Prospects in Shoulder and Elbow Surgery

Message from the Guest Editors

We are delighted to announce a forthcoming Special Issue, and we invite you to contribute your valuable research on the theme of “Trends and Prospects in Shoulder and Elbow Surgery”. Despite the remarkable strides and advancement in orthopedic and trauma surgery, in the field of upper extremities, knowledge remains limited and challenges persist. We welcome submissions from researchers, clinicians, and experts in the field to share their insights on emerging trends and future prospects. We would like to invite authors to support us with original articles or reviews including, but not limited to, the following topics: minimally invasive approaches, arthroscopy, joint replacement, trauma, and rehabilitation. We would like to create a platform to foster collaboration, exchange ideas, and shape the future trajectory of this dynamic field. We look forward to receiving your manuscripts and collectively advancing our understanding of the trends and prospects of shoulder and elbow surgery.
