Quality of Life in Patients with Gynecological Cancers

Message from the Guest Editors

Quality of life (QoL) is a multidimensional concept regarding patients' self-assessed situation. Quality of life assessment complements the objective information derived through history taking, physical examination, and investigations. Interdisciplinary care (physician, psychologist, dietitian, rehabilitation specialist, and social worker) is crucial in providing support at all levels of patient functioning. In the context of oncology, quality of life is critical because cancer treatment often involves a significant burden on the body, and the diagnosis itself can significantly impact the patient's mental and social well-being. We look forward to your important contribution to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
