Recent Advances in the Diagnosis and Treatment of Myocardial Infarction

Message from the Guest Editor

Acute myocardial infarction is a major global health concern. Innovations in diagnostic techniques, such as high-sensitivity cardiac troponin and other biomarkers, have facilitated earlier and more accurate diagnosis, enabling prompt intervention. Furthermore, advanced imaging modalities such as MRI and CT are playing an increasingly vital role in this pathology. Rapid reperfusion remains crucial for improving outcomes. Novel pharmacological treatments, including potent and rapid-action antiplatelet therapies and cholesterol-lowering drugs, have further enhanced the treatment landscape. Additionally, the widespread adoption of a new generation of drug-eluting stents has also contributed to enhanced outcomes. More recently, the emergence of diverse and promising devices for mechanical circulatory support has offered additional resources for patients with a poorer prognosis, although evidence regarding their use remains limited. However, despite these advancements, acute myocardial infarction remains a leading cause of death, underscoring the need for further research and innovation in this exciting field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
