Clinical Consequences of COVID-19: 2nd Edition

Message from the Guest Editors

In 2019, the novel severe acute respiratory syndrome coronavirus-2 (SARS-CoV-2) caused a global pandemic, representing a major public health crisis. There is wide consensus that the COVID-19 pandemic affected not only physical health but also mental health and wellbeing. As COVID-19 was a novel disease, much understanding of its clinical course and possible long-term health consequences remains uncertain. Given the enormous success of the First Edition of this Special Issue of *JCM*

https://www.mdpi.com/journal/jcm/special_issues/Clinical_Consequences_COVID,

we believe that it is time to launch the Second Edition, collecting additional insights into long COVID-19 and the post-COVID world. The Second Edition is keen to attract a global audience, welcoming contributions on this subject from researchers around the world.

Guest Editors

Dr. Francesco Alessandri

Dr. Francesco Pugliese

Dr. Giovanni Giordano

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
