

## Special Issue

# Clinical Trends in Cardiomyopathy

### Message from the Guest Editor

Remarkable progress has been made in the cardiomyopathy field over the past few decades, revolutionizing every step, from diagnosis to treatment. For starters, knowledge of the genetic background has significantly spread, allowing for the prompt adoption of preventive strategies for family members of probands. Moreover, the incredible technological improvements have increased the diagnostic sensibility of various imaging modalities. In particular, multimodality imaging has proven to be of the utmost importance to detect early cardiac manifestations of cardiomyopathies, thanks to novel technologies like speckle tracking imaging in echocardiography and tissue characterization in cardiac magnetic resonance. Moreover, multimodality imaging is also essential to evaluate disease progression and, in some cases, assess treatment efficacy. Finally, targeted therapies for specific types of cardiomyopathies are now available, and more are expected to be developed and implemented in the years to come. In this Special Issue, we welcome authors to submit papers on clinical trends in cardiomyopathies in terms of both diagnosis and treatment.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
