Novel Therapeutic Approaches for Gastroesophageal Cancer

Message from the Guest Editors

Gastroesophageal cancers remain a public health problem worldwide with over 1 million new cases and a fatality-to-case ratio of 70%. Indeed, the availability of a more accurate staging, less-invasive surgical techniques and more effective perioperative chemotherapy has improved the curability by 10% in the resectable setting. Moreover, incremental yet steadily survival advantages have been recorded in the unresectable advanced disease as a result of the growing array of evidence-based options including targeted agents and immunotherapy in second and later lines and the improved patients' selection through molecular characterization. In parallel, emerging precision-medicine tools such as liquid biopsy and patients-derived organoids provide a reliable platform for drug screening, studying resistance mechanisms and identifying novel therapeutic targets and ultimately personalize treatment strategies. The aim of this Special Issue is to provide readers with most updated research findings on novel approaches in the multidisciplinary management of gastroesophageal cancer, including research papers, narrative reviews, systematic reviews and meta-analysis.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
