Novel Research in Gender Incongruence

Message from the Guest Editor

Although the classification gender identity disorder in the ICD-10 will be replaced by gender incongruence in the ICD-11, which is supposed to be released in 2018, a marked and persistent incongruence between an individual's experienced gender and the assigned sex is a crucial issue not only in the medical but also in the human rights, cultural, legal, educational and social fields throughout the world. Its exact prevalence in the world has not been fully clarified because of the lack of internationally comparable epidemiological studies using the same protocol. In general, to adapt the figure of the body to the native gender identity, physical treatments. However, solid evidence to support the efficacy and effectiveness of these treatments based on well-designed clinical studies is insufficient.

Furthermore, the long-term outcome and impact on the QOL after the intervention for gender incongruence are not well known. This Special Issue aims to discuss manuscripts presenting novel findings on gender incongruence in terms of basic, clinical and epidemiological research. Of course legal, educational and social research will also be enthusiastically welcomed.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
