State-of-the-Art in Genitourinary Reconstruction

Message from the Guest Editors

The practice of genitourinary surgical reconstruction is challenging and rapidly changing. Techniques are constantly evolving to improve outcomes. Our mental plan for a particular surgery can change intraoperatively and different skills are needed to perform these operations. Surgery to restore normal function by repairing, rerouting, or recreating areas of the upper or lower urinary tract and genitalia is not enough. Furthermore, we are now paying more attention to patient-reported quality of life. In addition, the milestones in regenerative surgery, biotechnology, and new materials have not been completely translated into clinical practice. The aim of this Special Issue is to highlight recent advances in the context of diagnosis, treatment, and prognosis for various genitourinary reconstructive procedures.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
