

Special Issue

Pathogenesis, Clinical Diagnosis, Treatments and Complications of Glomerular Diseases

Message from the Guest Editors

The area of glomerular diseases is changing and research that aims to gain insight into the pathogenesis, diagnosis, and complications of, treatment approaches to, or therapeutic measures for the underlying disease is on the increase. This Special Issue welcomes articles either highlighting recent developments in or providing new experimental (in vitro or animal model) or clinical (human) data related to glomerular diseases. We would appreciate it if the authors provided a brief section in their manuscript indicating the novelty of their findings or, in the case of review articles, provided personal views on a particular topic (e.g., treatment of recurrent glomerulonephritis after kidney transplantation). In summary, we are happy to host this Special Issue and welcome solicited and unsolicited submissions that will contribute to its success.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
