Surgical Insights into Foot and Ankle Diseases

Message from the Guest Editor

The progress of foot and ankle surgery over the last decades has been remarkable. New implants and various new procedures have been introduced in the current clinical practise with a view to optimise clinical outcomes. Indications for surgical intervention have also changed, and joint replacement surgery is gaining popularity. In this Special Issue, we encourage authors to submit papers and share their perspectives related to foot and ankle surgery. Of note, all study designs are welcome except case series and case reports.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
