Reconstructive Microsurgery: Challenges and New Perspectives

Message from the Guest Editor

The subspecialty of reconstructive microsurgery utilizes microsurgical techniques to allow surgeons to operate on the smallest of structures, including vessels, lymphatics, and nerves. Traditionally, these procedures have been used by microsurgeons to reconstruct complex tissue defects through the use of free tissue transfer, which involves transfer of tissue (free flaps) between distant anatomic sites on the body. As the field has advanced, microsurgical techniques have been applied to even smaller structures, opening the door for new procedures, such as lymphatic reconstruction in the management of lymphedema and new types of free flaps. In addition, refinement in the technique has allowed microsurgeons to now perform many of these procedures with minimal donor site morbidity. Lastly, trends in plastic and reconstructive surgery have also resulted in more widespread use of other applications for microsurgery, such as gender-affirming surgery and vascularized tissue allotransplantation. This Special Issue seeks to present the latest challenges and perspectives in reconstructive microsurgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
