Clinical Advances in Maternal-Fetal Medicine

Message from the Guest Editor

Since the 1970s, maternal and fetal medicine (as a branch of obstetrics and gynecology) has been revolutionized. Research is very important for cases of high-risk pregnancies, and it is not only limited to the clinical aspects but it also concerns biochemical markers, precision medicine, and recently, artificial intelligence and its perspective on the varieties of diseases. Therefore, this Special Issue encourages scientists to publish papers concerning all the aspects of maternal and fetal medicine.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
