

Special Issue

Preventive, Diagnostic and Therapeutic Strategies for Abdominal Surgery Complications

Message from the Guest Editor

Surgery is indicated to cure or palliate numerous physical ailments, and millions of operations are performed each year worldwide. While the risk of complication overall is low because of the presence of trained and skilled surgeons and the adaption of good surgical techniques, complications can still occur even with the most experienced of surgeons or in the simplest of cases. Surgery can be complicated by adverse effects that can affect daily living by impairing the quality of life, increasing the cost of health systems by longer hospitalization times, and even increasing mortality and decreasing life expectancy. Complications can be more or less severe; can resolve spontaneously or require medical, interventional, or surgical treatment; and can be specific to the operation performed or general, but all are significant for the patient and are usually the most difficult part of the patient's management. Prompt and early diagnosis of the complications and adequate and proper treatment are the cornerstones in the successful management of complications. This Special Issue will focus on Diagnostic and Therapeutic Strategies for Abdominal Surgery Complications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi
