

Special Issue

New Advances in Cleft Lip and Palate and Facial Plastic Surgery

Message from the Guest Editors

Facial plastic and reconstructive surgical procedures, including the surgical treatment of cleft lip and palate, aim at achieving functional restoration and esthetic harmony. Current research is increasingly directed toward understanding growth-related changes, optimizing surgical timing, and integrating advanced technologies such as three-dimensional imaging, virtual planning, patient-specific grafting, and regenerative tissue engineering. This Special Issue of the *Journal of Clinical Medicine* aims to highlight translational and clinical advances in facial plastic surgery, with particular emphasis on the nasolabial complex and rhinoplasty. Contributions exploring long-term functional and esthetic outcomes, innovative surgical techniques, multidisciplinary treatment protocols, and patient-reported outcome measures are especially encouraged. By bridging research-driven innovation with clinical practice, this collection seeks to inform evidence-based strategies that improve both surgical precision and patient quality of life.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
