Diagnosis, Emerging Therapies, and Biomarkers in Ovarian Cancer: Shaping the Future of Clinical Practice

Message from the Guest Editor

Globally, ovarian cancer ranks sixth among malignant tumors and fifth as a cause of cancer-related mortality in women. Despite the progress, due to the absence of specific early symptoms, effective screening tests, and characteristic peritoneal spread, 75% of patients are diagnosed in the advanced stages and most of these patients relapse. Standard therapy involves cytoreductive surgery followed by chemotherapy, but the poor prognosis and the attention to the genetic landscape have driven interest in alternative therapies such as targeted molecular agents that have demonstrated efficacy in both mutated and non-mutated patients. In this Special Issue, we welcome authors to submit papers (reviews or clinical trials) on the clinical advances in ovarian cancer in terms of both diagnosis and medical and surgical treatments, and how these aspects are changing due to the molecular discoveries and biomarkers in the era of precision medicine.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
