Research Status of Attention Deficit Hyperactivity Disorder

Message from the Guest Editor

For all ages, Attention Deficit Hyperactivity Disorder (ADHD) is one of the most prevalent disorders in the world. However, its diagnosis still depends on the expertise of the observer since we lack biomarkers with sufficient diagnostic capacities. Thus, the introduction of new technologies could help diagnostically. On the other hand, ADHD is a disorder with high comorbidity, both medical and psychiatric, a factor which has been only partially studied. Likewise, the correct identification of ADHD in adulthood is the exception, which is concerning, since its prevalence in this age group is 2.5%. Finally, multimodal treatment is still insufficient, so the integration of new therapeutic strategies, such as the use of serious video games and/or food supplements, and the introduction of new drugs represent an opportunity to improve the treatment, evolution and prognosis of ADHD. The aim of this Special Issue is to provide an update on the latest developments in the diagnosis and treatment of ADHD.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
