"Neurosurgery": Emerging Clinical Skills in 2022 and Beyond

Message from the Guest Editor

Since 1919, the prelude of modern neurosurgery history, neurosurgical expertise, technology, resources, and access to information have continually evolved around the globe. With the in-depth exploration of cranial base anatomy by Dolenc and Rhoton and the introduction of the emerging surgical concept and endoscopic technology, the application of neurosurgery has expanded from the supratentorial space to the whole central cranial base. Despite all this inspiring progress, surgical management of intracranial lesions is still associated with high post-operative morbidity and mortality due to the inherent eloquent location. What techniques or specific skills used in neurosurgery could benefit patients the most? This is clearly an issue that must be solved urgently. Thus, in this Special Issue, I would like to invite authors to submit studies focusing on new and developing surgical skills and clinical techniques assisting the diagnosis, pre-operative evaluation, intraoperative monitoring and postoperative rehabilitation of neurosurgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
