

Special Issue

Progress and Innovation in the Clinical Management of Psychosis

Message from the Guest Editor

This Special Issue will explore the evolving landscape of psychosis research and clinical practice, highlighting recent advances and emerging therapeutic approaches. We invite contributions that examine innovative diagnostic tools, neurobiological mechanisms, and evidence-based interventions for psychotic disorders, including schizophrenia, brief psychotic episodes, and substance-induced psychosis. Key areas of interest include the following: precision medicine approaches that utilize genetic and neuroimaging biomarkers; novel pharmacological interventions and their mechanisms of action; psychosocial interventions and recovery-oriented care models; digital health technologies and telemedicine applications; early intervention strategies and prevention programs; cognitive enhancement therapies; and the integration of patient-reported outcomes with clinical assessments. Both original research articles and comprehensive reviews are encouraged, with emphasis on translating scientific discoveries into improvements in clinical practice that enhance the outcomes and quality of life for individuals experiencing psychosis.

Guest Editor

Dr. Valerio Ricci

Department of Psychiatry, San Luigi Gonzaga Hospital, University of Turin, Orbassano, Italy

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
