Advances in Vascular and Endovascular Surgery: Second Edition

Message from the Guest Editors

Over the last two decades, endovascular treatment options for a myriad of vascular diseases have been increasingly improved and developed. Aortic surgery stands out as a prominent example where endovascular techniques have successfully complemented established open surgical procedures. Ultimately, the popularization of endovascular aortic repair, which itself has developed to a point where highly complex aortic pathologies can be treated using a large repertoire of off-the-shelf and custom-made devices, has undoubtedly contributed to improved patient care. Open and endovascular techniques and their development for peripheral arterial or carotid diseases have been equally important in the vascular surgeon's armament, and exciting new developments could spur relevant clinical advances in the treatment of patients requiring hemodialysis access.

This Special Issue of *JCM*, entitled "Advances in Vascular and Endovascular Surgery: Second Edition", provides an opportunity for authors and readers dedicated to improving vascular education and patient care to create and refer to a collection of papers on advances and new insights within our field.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
