Congenital Heart Disease: Diagnosis, Clinical Characteristics, Prognostic Implications, and Management

Message from the Guest Editors

We are pleased to announce this Special Issue on congenital heart disease, with a focus on diagnosis, clinical characteristics, prognostic implications, and management. Congenital heart diseases (CHDs) are the most common congenital defects in live births (with an incidence rate of approximately 1%). Although clinical characteristics may facilitate the diagnostic process, prognostic implication and management remain a challenge. The latest innovations on echocardiographic hardware and software, the role of the cMRI/CT scan, and the zero-fluoroscopy approach for the treatment of heart defects and arrhythmias represent significant innovations in this field. Finally, the new role of genetical diagnosis and a more focused genotype–phenotype correlation on CHD and arrhythmias may also facilitate a better way of managing these congenital disorders. We hope that this Special Issue will provide a comprehensive update on the topic and a thorough overview of the most recent advances in the field. Therefore, we encourage researchers to submit their contributions to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
