

## Special Issue

# Big Data and Precision Medicine Series II: Human Papillomavirus and Cancer

### Message from the Guest Editors

Human papillomaviruses (HPV) have been recognized as the major risk factor for development of nearly all cervical cancers, and a significant fraction of other human carcinoma, arising from mucosal squamous epithelia, including anal, vaginal, vulvar, penile and oropharyngeal cancer. Long-term persistent infections, the integration of viral DNA into the human genome, and constitutive expression of viral oncoproteins contribute to many heterogeneous molecular changes in infected cells, leading to cancer development and progression. Many genetic and epigenetic alterations, as well as complex molecular networks have been identified by “omics” technologies in HPV-related cancer. We welcome submissions of research and review articles on the “omic” landscape of HPV-related cancer to gather current knowledge on the complex process of viral oncology.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
