Clinical Advances in Orthopedic Trauma Surgery

Message from the Guest Editors

Orthopedic trauma, which often involves bone fractures, joint dislocations and associated soft tissue injury, is a public health issue around the world. This is particularly true for people with osteoporosis and previous joint replacements. Advancements in orthopedic trauma surgery are being made in a multitude of areas to improve the care of trauma patients and therefore decrease the burden of disease. Advances are being made in musculoskeletal imaging and the management of soft tissue injuries. New biologics have been developed to further promote bone healing. Additionally, newer techniques and implants are now available to improve the care and outcomes in patients who have suffered traumatic long-bone fractures, treatment of periprosthetic and inter-prosthetic fractures, fractures of the proximal femur, as well as fractures of the pelvis and acetabulum. Advances are also being made for the treatment of high-energy foot and ankle trauma, as well as fractures of the scapula and glenoid neck. In this Special Issue, we welcome authors to submit papers that address recent clinical advances in orthopedic trauma surgery.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
