Neurosurgery: Recent Advances and New Perspectives in Skull Base Approaches

Message from the Guest Editors

The management of skull base lesions in our patients requires a deep understanding of anatomy and remarkable interdisciplinarity at the interface with advanced technologies. Neuro-navigation, now firmly established in our clinical practice, is increasingly combined with augmented reality and machine learning. Artificial intelligence enhances our skills before, during, and after surgery. The use of the endoscope and, more recently, the introduction of the 3D exoscope is becoming increasingly valuable in clinical practice, particularly when applied to the latest minimally invasive approaches, such as the transorbital approach. The goal of this Special Issue is to gather the best contributions in the field of new technologies applied to neurosurgery, creating a bridge between well-established aspects like surgical neuroanatomy and the essential study of cadavers, which is increasingly enhanced and supplemented by augmented reality. These range from standard to more advanced techniques, including microsurgery, endoscopy, and even exoscopy.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
