Hair and Scalp Diseases

Message from the Guest Editor

Hair and scalp diseases are a rapidly growing field of basic and clinical research. There is an increased understanding of the hair as an important factor determining the quality of life. New diagnostic techniques, such as trichoscopy or reflectance confocal microscopy and novel therapeutic methods, such as JAK inhibitors and biological drugs contribute to the field of hair and scalp diseases being a topic of significant interest in dermatology and in medicine in general. This issue will focus on the systemic aspects of hair and scalp diseases, novel diagnostic techniques and new developments in treatment.
