Innovation in Head and Neck Reconstructive Surgery

Message from the Guest Editors

The field of head and neck reconstruction is exceptionally complex. Many of the anatomical structures requiring reconstruction have a crucial role in facial morphology and for functions such as speech, swallowing, and mastication. All these aspects strongly influence the patient's daily quality of life.

Over the past few years, the development of new technologies such as virtual surgical planning and 3D printing have been shown to result in better outcomes in terms of reconstructive accuracy, with good improvement in results as compared to traditional reconstruction techniques. The field of head and neck reconstruction is on the move. In fact, computer-assisted surgery with customized implants is becoming increasingly common for head and neck reconstruction, also associated with revascularized tissue transfer.

These techniques allow surgeons to provide increasingly personalized reconstruction, improving the average results and reducing surgical time.

The present Special Issue aims to explore these new frontiers of reconstructive surgery as supported by 3D technology.

Guest Editors

Prof. Dr. Achille Tarsitano

1. Maxillo-Facial Surgery, Department of Biomedical and NeuroMotor Sciences, University of Bologna, Bologna, Italy
2. Head of Oral and Maxillo-Facial Surgery Unit, IRCCS Azienda Ospedaliero-Universitaria di Bologna, Bologna, Italy

Prof. Dr. mult. Florian M. Thieringer, MHBA

1. Oral- and Cranio-Maxillofacial Surgery, University Hospital Basel, Basel, Switzerland
2. Swiss MAM Research Group, Department of Biomedical Engineering, University of Basel, Basel, Switzerland

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPLus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
