

## Special Issue

# Clinical Management of Hemodialyzed Patients: From Pharmacological Interventions to Advanced Technologies

### Message from the Guest Editor

Uremic toxins represent independent risk factors for the mortality of hemodialyzed (HD) patients, as they are poorly removed through conventional, diffusive techniques. Several studies have associated middle toxin molecules with the pathological features of uremia, such as immune dysfunction and inflammation, as well as adverse outcomes in HD patients. Systemic inflammation plays a pivotal role in morbidity and mortality in these patients, contributing to atherosclerosis, cardiovascular disease, and anemia. Furthermore, immune deficiency leads to impaired response to vaccination and increased incidence, severity, and poor outcome of microbial infections. The aim of this Special issue is to carry out an in-depth analysis of pharmacological interventions and new technologies applied to HD patients, designing clinical management based on a personalized medicine. Papers evaluating new biomarkers of inflammation and altered immunity status in HD patients, as well as noninvasive devices able to detect biological data in real time, are welcome.

### Guest Editor

Dr. Paolo Monardo

Nephrology and Dialysis Unit, Internal Medicine Department, Papardo Hospital, Contrada Papardo, 98158 Messina, Italy

### Deadline for manuscript submissions

closed (31 December 2022)

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1  
(General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
