Current Challenges and Opportunities of Hepatobiliary Surgery in 2022 and Beyond

Message from the Guest Editors

Hepatobiliary surgery is one of the most challenging and rapidly expanding surgical fields. In the last twenty years, liver surgery has been completely revolutionized with the introduction, discovery and launch of new ultrasound-guided parenchyma-sparing techniques, new frontiers in transplant indications and minimally invasive approaches.

At the same time, technology is already changing our lives in all fields. It is both subtly and obviously omnipresent. Thanks to the improvement of technology in all fields we are changing our behaviors in the management and indications of liver surgery. Therefore, it is up to us to understand its potential in investigating the new frontiers in all fields, from diagnosis to treatment.

We should investigate these novelties with special attention concerning minimally invasive and robot-assisted liver surgery, integrated oncological therapies and the implications of artificial intelligence, which will improve our knowledge in the near future.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
