Proximal Humeral Fractures—Current Trends and Innovations

Message from the Guest Editor

Proximal humeral fractures are among the most challenging and fascinating entities in traumatology. Each individual treatment path leads along a narrow ridge, between the risk of impaired shoulder function and potential complications on one hand, and improved quality of life on the other. One of the big challenges is identifying which patient and fracture is best suited to, and will most benefit from, non-operative or surgical treatment. In case of surgical treatment, the decision between humeral head preserving surgery and fracture arthroplasty must be made thoughtfully. Owing to the particular anatomy of the proximal humerus, soft tissue management is crucial. Double plating, fibular strut grafts, screw augmentation and bone void filling are only a few of the recent developments in fracture fixation. In case of humeral head replacement, use of reverse total shoulder arthroplasty is increasing. A critical evaluation of its indication is needed. This Special Issue aims to be a forum for high-quality publications that inform on current trends and developments in proximal humeral fracture treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
