Chronic Kidney Disease: Current Challenges and Adverse Outcomes

Message from the Guest Editors

Chronic kidney disease (CKD) often remains asymptomatic until advanced stages, making early diagnosis difficult. Improved screening and biomarkers are essential to identify CKD earlier and initiate timely interventions. Controlling progression involves comprehensive management, including hypertension, diabetes, and lifestyle factors. Understanding individual patient risk profiles can tailor treatments to slow kidney function decline. CKD leads to complications like cardiovascular disease, anemia, and bone disorders and effective management strategies are needed to reduce adverse outcomes and to improve quality of life. By mobilizing interdisciplinary efforts, we aim to develop improved diagnostics, therapies, and management strategies to reduce CKD adverse outcomes. In this Special Issue, we encourage submissions from clinicians, health experts, and researchers worldwide to share insights and novel approaches to epidemiology, diagnosis, and treatment advances in chronic kidney disease.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
