Comprehensive Hernia Surgery: From Clinical Diagnosis to Postoperative Care

Message from the Guest Editor

Nowadays, the surgical treatment of ventral hernia represents a continuous challenge. This is mainly due to hernia location (lateral, parastomal), complexity (in relation to the width or to a loss of domain), or to the patient's weight, especially obesity. Ventral hernia incidence, size, and recurrence rate are all increased in this population. This Special Issue aims to provide a comprehensive overview of the advances in the treatment of ventral hernia, with particular interest in the management of patients with obesity, complex localisations, and the use of innovative techniques of preoptimization (botulinum toxin, preoperative pneumoperitoneum) and surgical repair (innovative mesh, robotic). They are now also performed with a minimally invasive approach. The lack of strong evidence and expert consensus on these topics has identified gaps in knowledge where there is a need for further evidence. Therefore, researchers in the field of abdominal wall repair are encouraged to submit their findings as original articles, meta-analyses or reviews, and surgical techniques to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
