

Special Issue

Pregnancy Complications: Causes, Diagnosis, and Current Treatment

Message from the Guest Editor

This Special Issue aims to explore the causes, diagnosis, and current treatment options for various pregnancy complications from a clinical perspective. Pregnancy complications pose significant challenges to both maternal and fetal health, requiring a comprehensive understanding of their underlying causes and effective management strategies. This Special Issue will feature in-depth discussions on a wide range of pregnancy complications, including gestational diabetes, preeclampsia, placenta previa, preterm labor, and fetal growth restriction. Through a collection of expert articles, this Special Issue seeks to provide healthcare professionals with up-to-date knowledge and evidence-based practices to optimize the care and outcomes for pregnant women experiencing complications.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
