Special Issue

Latest Advances in Thoracic Surgery: 2nd Edition

Message from the Guest Editor

This Special Issue aims to discuss three primary topics:

- Minimally Invasive Techniques: Thoracic surgery has seen significant advancements in minimally invasive procedures. Video-assisted thoracoscopic surgery (VATS) and robotic-assisted surgery (RATS) have become more prevalent. These techniques involve smaller incisions, reduced trauma, shorter hospital stays, and faster recovery times for patients compared to traditional open surgery.
- Lung Cancer Treatments: Advances in lung cancer treatments have led to improved surgical outcomes.
 These include the application of targeted therapies and immunotherapies, which have expanded the treatment options for patients with advanced or recurrent lung cancer.
- Image-Guided Surgery: Advanced imaging technologies, such as 3D CT scans and intraoperative navigation systems, have allowed surgeons to gain a more precise view of thoracic structures during surgery, enabling them to perform more accurate and targeted procedures.

It is important to note that the field of medicine, including thoracic surgery, is continuously evolving. New advancements may have emerged since the previous issue, and I would like to discuss these topics.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
