

## Special Issue

# Early Clinical Diagnosis of and Intervention in Pediatric Cerebral Palsy

### Message from the Guest Editors

Cerebral palsy (CP), resulting from brain damage during fetal or infant development, is the most common childhood motor disorder and associated impairments have consequences for development and participation. Cerebral palsy is a clinical description rather than a distinct diagnosis. The challenges concern whether the children's abilities can be improved by intervention and whether we can understand more about the factors influencing development after an early brain lesion. Coherent and flexible services are required to meet the needs of the families, necessitating the inclusion of the parent/carer voice and expectations. The aim of this Special Issue is to provide an overview of recent advances in the early diagnosis and treatment of pediatric cerebral palsy, as well as early detection and treatment of associated comorbidities and complications. Researchers in the field of cerebral palsy are encouraged to submit original articles or reviews to this Special Issue, so that we can build an evidence base to guide decision making.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

---

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
